

Standard 5: Leadership Skills: Communication and Critical Reasoning

Principle

Professional foresters must possess critical reasoning skills to analyze and communicate complex ideas clearly and provide advice to a range of clients.

Clear and concise communication is essential for Canada's professional foresters to be able to articulate goals, objectives, information and decisions to a wide range of audiences and stakeholders.

Canada's professional foresters are required to work individually and to participate in and lead multi-disciplinary teams to address multifaceted problems.

Leadership requires the ability to effectively use communication and reasoning skills to inspire higher standards of practice and to contribute positively to society through initiative and collaborative problem solving.
